

INDUSTRIAL COOLING SYSTEM

- They are produced in accordance with the conditions of cold and frozen storage rooms.
- They are high-tech cooling units that can be used in all commercial and industrial cooling applications.
- They can be produced with semi-hermetic and screw compressors.
- They have options of air or water-cooled condensers.
- It can be diversified with different designs according to the need.
- The soundproof cabin is designed in accordance with external weather conditions.
- It can be offered optionally with a discrete condenser.
- It can also be made as an open or closed cabin.
- It is produced in compliance with European Union standards and is CE marked.
- It is shipped ready for installation with the electrical panel and all control elements.

ADVANTAGES

- Compliance with standards
- High efficiency
- High electricity savings
- Suitable for GES projects
- Durable cabin suitable for outdoor conditions
- Minimum noise level
- Reliable quality equipment
- Complete product
- Easy installation and assembly
- Easy maintenance
- Product variety
- Opportunity for custom model designs
- Wide range of products
- Compliance with HACCP standards

TECHNICAL SPECIFICATIONS

- Electrostatic powder-coated cabin
- Low-high voltage protection relay
- Thermal magnetic circuit breaker
- Contactor for three-phase to single-phase compressors
- Crankcase heater
- Copper pipe and aluminum fin condenser
- Fan speed control
- Receiver
- Drying filter
- Liquid sight glass
- Liquid flow control solenoid valve
- Service and maintenance valve on the liquid line
