

## INDUSTRIAL SPLIT DEVICE UNIT

- They are manufactured in accordance with the requirements of cold and frozen storage rooms (SC1, SC2, Sc3).
- They have hermetic, semi-hermetic and scroll compressors with air-cooled condensers.
- The device has a remote control panel.
- It is packaged according to external weather conditions.
- It is produced in accordance with European Union standards and has a CE mark.
- The outdoor unit is delivered with nitrogen charge.

### ADVANTAGES

- Compliance with standards
- High efficiency
- Energy saving
- Suitable for GES projects
- Durable cabinet resistant to outdoor conditions
- Minimum noise level
- Reliable and high-quality equipment
- Complete product
- Easy installation and assembly
- Easy maintenance
- Product diversity
- Opportunity for special model designs
- Wide range of products

### TECHNICAL SPECIFICATIONS

- Electrostatic powder-coated cabin
- Low-high voltage protection relay
- Thermal magnetic switch
- Contactor for three-phase to single-phase compressors
- Crankcase heater
- Copper tube aluminum finned condenser
- Fan speed control
- Receiver
- Drying filter
- Liquid sight glass
- Liquid flow control solenoid valve
- Service and maintenance valve on liquid line
- Low-high pressure pressostat
