

## MONOBLOCK DEVICES

- It is manufactured in compliance with European Union standards and CE marked.
- The device is of a compact type and is shipped with all equipment assembled and charged with gas.
- It is cassette designed according to both indoor and outdoor conditions.
- It is equipped with hermetic compressors and air-cooled condensers.
- It is produced in 21 different models that comply with the requirements of cold and frozen storage rooms.
- Our monoblock devices can be produced as standard, angled, and ceiling types depending on the suitability of the installation area.
- Our device has an electric defrost mechanism.
- The condensation water generated in the device is evaporated and discharged on its own without the need for any drain.

### ADVANTAGES

- Compliance with standards
- High efficiency
- Provides high electricity savings
- Suitable for GES projects
- Durable cabin suitable for outdoor conditions
- Minimum noise level
- Reliable and high-quality equipment
- Complete product
- Easy installation and assembly
- Easy maintenance
- Product variety
- Possibility of custom model design
- Wide range of products

### TECHNICAL SPECIFICATIONS

- Electrostatic powder-coated cabinet
- Low-high voltage protection relay
- Thermal magnetic circuit breaker
- Contactor for three-phase or single-phase compressors
- Copper tube aluminum finned condenser
- Fan speed control
- Receiver
- Drying filter
- Liquid sight glass
- Liquid flow control solenoid valve
- Service and maintenance valve on liquid line
- Low-high pressure switch
