

## PVC STRIP CURTAIN

PVC Strip Door Systems fully comply with Turkish Food Codex and relevant regulations. They offer ideal solutions for food establishments that have been restructured in accordance with Decree Law No. 560 on the production, consumption, and inspection of food, as well as related legislation. PVC Door Systems are particularly recommended for businesses in the food sector to provide a healthy and clean environment.

### PURPOSE OF USE

- It is to prevent hot-cold air losses.
- It increases economic efficiency with energy saving.
- It protects the establishment from birds, flies, insects and all flying pests.
- It reduces odors, gases, dust, and other pollutants that pollute the air.
- It provides hygiene in the room.
- It is easy to install. It cuts the welding light that is harmful to the eye in welding rooms.
- It is light-permeable for a safer working area. It reduces machine noise.
- It requires minimum maintenance.

### APPLICATION AREAS

- At main doors inside or outside the factory
- At personnel entrance and exit doors
- At loading doors
- In kitchen doors
- In paint shops
- In welding and steam compartments
- In production compartments
- In cold storages and freezer room entrances, as well as in conveyors and systems.
- It is especially recommended for a healthy and clean environment in food industry businesses.
